EXPERIENCE

Junior Frontend Developer | Broadway Gaming

11/22 - 12/23 Dublin, Ireland

- Optimised our code base using Storybook to isolate, document and test components in various states
- Working with Material UI and an extensive theme set-up (MUI4)
- Developed our new company corporate website using NextJS as part of a small team
- Took part in cross-department collaboration to enhance usability and design of various other interfaces

Junior Developer | Baase AB (Rivr)

03/21 - 07/22 Stockholm, Sweden (Remote)

- Started working on the frontend application interface using Razor pages with Bootstrap
- Maintained the company corporate website through a CMS built on SQL
- Switched to ReactJS, Typescript and Redux mid-way through the year and helped to re-build the application
- Implemented the professional application UX/UI design
- Created engaging Figma wireframes and presentations for investor and customer on-boarding

Data Analyst | KPMG

01/19 - 09/19 Dublin, Ireland

- Operated on Excel and IDEA to format and manipulate data using formulae and charts
- Reviewed data in order to flag irregular trends and patterns to on-site teams
- Worked closely with team members to deal with difficult data sets
- Participated in various volunteering programmes
